Define Problem Statements (Customer Problem Statement Template)

Create problem statements from the customer's point of view. For LegalEase, the problem is the difficulty of creating structured legal-document drafts without a legal background, including issues around terminology, formatting, customization and export.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An entrepreneur, professional or individual without a legal background	Create a structured legal document for a specific need	Manual drafting and legal terminology can be difficult, and templates may not match the required inputs	The user needs to enter parties, dates, terms and document type and wants a customizable AI-assisted draft	Confident and better able to understand and prepare the first draft
PS-2	A user who needs a contract, NDA or lease draft	Customize the generated wording and document format	Generic documents may require repeated manual editing and formatting	LegalEase provides editable previews, branding and export to PDF, DOCX and TXT	More in control of the document before review and use
