

Project Demo Planning

Date	15 March 2026
Team ID	SWTID-2026-9030
Team Size	5
Project Name	AI/ML and Gen-AI Track Project
Maximum Marks	As specified in the template

Project Demo Planning:

A structured demonstration plan covering the problem statement, solution overview, proposed features, live demonstration and Q&A.;

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project objective, target users and problem being addressed.	3	Project Team
2	Solution Overview	Explain the overall AI/ML and Gen-AI based solution and workflow.	4	Project Team
3	Registration & Login	Demonstrate registration, email confirmation and login flow.	4	Project Team
4	Core Feature Demonstration	Demonstrate the main implemented project features and expected outputs.	6	Project Team
5	Results & Validation	Show sample results, validation and key observations.	3	Project Team
6	Q&A; Session	Answer questions and clarify implementation details.	5	Project Team

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the problem and project objective.
2	Solution Overview	Explain the proposed AI/ML and Gen-AI workflow.
3	Live Feature Demonstration	Show registration/login and the main project features.
4	Q&A; Session	Address questions and summarize the outcome.

Communication

Date	15 March 2026
Team ID	SWTID-2026-9030
Team Size	5
Project Name	AI/ML and Gen-AI Track Project
Maximum Marks	As specified in the template

Communication Plan:

Effective communication is maintained through regular team coordination, progress updates, issue discussions, stakeholder reviews and final demo preparation.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Team chat / meeting	5 team members	Share progress, blockers and next tasks.
2	Progress Update	Weekly	Team meeting / document	5 team members	Review completed work and upcoming tasks.
3	Issue / Bug Discussion	As Needed	Team chat / meeting	Relevant team members	Identify, discuss and resolve issues.
4	Stakeholder Review	Bi-Weekly	Online meeting	Team & stakeholders	Review progress and collect feedback.
5	Final Demo Rehearsal	Once	Online meeting	5 team members	Practice the final demonstration flow.
6	Documentation Review	As Needed	Shared document	5 team members	Check completeness and consistency of project documents.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Different schedules among team members	Use planned daily/weekly check-ins and record action items.
2	Delayed issue reporting	Raise blockers during standups and discuss urgent issues as needed.
3	Changes in demo requirements	Review updates with the team and revise the demo/documentation plan.

Demonstration of Proposed Features

Date	15 March 2026
Team ID	SWTID-2026-9030
Team Size	5
Project Name	AI/ML and Gen-AI Track Project
Maximum Marks	As specified in the template

Demonstration of Proposed Features:

The following feature set is organized from the supplied project-template material, with registration/login explicitly represented and the remaining project features grouped at a high level.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	User Registration	Register with email and password and confirm the registered email.	Planned	Yes	Included in demo flow.
2	Email Confirmation	Receive a confirmation email after registration.	Planned	Yes	Show confirmation flow if available.
3	Facebook Registration	Register through the Facebook-based registration option.	Planned	Yes	Demonstrate if configured.
4	Gmail Registration	Register through the Gmail-based registration option.	Planned	Yes	Demonstrate if configured.
5	User Login	Log in using registered email and password.	Planned	Yes	Included in demo flow.
6	AI/ML & Gen-AI Core Feature	Demonstrate the project's primary AI/ML and Gen-AI capability.	Planned	Yes	Project-specific implementation details were not visible in the supplied screenshots.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	Not verifiable from supplied material
Total Features Demonstrated	6 planned demo items
Overall Implementation Rate (%)	Not verifiable from supplied material

Scalability & Future Plan

Date	15 March 2026
Team ID	SWTID-2026-9030
Team Size	5
Project Name	AI/ML and Gen-AI Track Project
Maximum Marks	As specified in the template

Scalability & Future Plan:

This plan outlines areas that can be addressed as the project grows, while keeping the current template structure.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address
1	Limited capacity for increasing user load	Response time may increase as usage grows.	High
2	Data storage growth	Larger datasets require scalable storage and management.	Medium
3	Performance and model-processing limits	Higher workloads may increase processing time.	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Suitable for current project scope	Use scalable deployment and load balancing as users increase.
2	Data Storage	Project-scale storage	Adopt scalable databases/storage and data management practices.
3	Performance	Designed for current workload	Optimize code/models and introduce caching or distributed processing where required.
4	Security	Basic project-level controls	Strengthen authentication, authorization, data protection and monitoring.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Stabilize and validate current core features	0–1 month	Improved reliability and demo readiness.
Phase 2	Improve scalability, storage and performance	1–3 months	Better support for increased usage and data.
Phase 3	Enhance AI/ML and Gen-AI capabilities	3–6 months	Broader functionality and improved outputs.
Phase 4	Production hardening, monitoring and security	6+ months	More robust long-term deployment.
